

PRODUCTO DESCRIPCIÓN:

NOMBRE:	Piezas y componentes de máquinas de impresión 3D personalizados en China
TRATAMIENTO:	Mecanizado CNC.
MATERIAL:	Aluminio, acero inoxidable, latón, bronce, zinc, aleación, plástico etc.
DIMENSIONES	Según el dibujo del cliente.
TERMINAR:	Anodizado, arenado, tratamiento térmico, pulido, polvo Revestimiento, galvanoplastia, pulverización, pintura, serigrafía etc.
TOLERANCIA:	Puede alcanzar hasta +/- 0.002mm.
CALIDAD CONTROLAR:	100% inspeccionado.
ESPECIFICACIÓN:	Servicio de OEM, estrictamente por dibujo y muestras.
EL TIEMPO DE ENTREGA:	10-25days --- La mejor venta en China fabrica piezas de mecanizado de alta precisión para tornos CNC.
SOLICITUD:	Piezas de fundición de aluminio, accesorios de minería, maquinaria. accesorios, autopartes etc.
Cliente principal:	EE.UU., Canadá, Australia, UE, etc.
PROCESO DE DAR UN TÍTULO	ISO9001, SGS.
PAGO:	T / T o Paypal u otros --- La mejor venta en China fabrica piezas de mecanizado de torno CNC personalizadas de alta precisión.

High precision processing technology

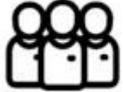

High quality surface treatment

OUR ADVANTAGES

1 Profession 

A professional OEM&ODM Die casting & CNC machining manufacturer.

2 Team 

A strong and professional engineers team with more than 10 years relative experience.

3 Experience 

The professional sales team and QC team have 5-10 years experience.

4 Quality assurance 

Strict quality control process and 100% inspection.

5 Professional inspection 

Our strict final QC team will inspect the dimension, appearance and package and send the professional inspection report to you before shipping.

6 Rich export experience 

Rich export experience to Europe, United States, Canada ,Australia etc..

CERTIFICATE

If you want to be our customer, pls kindly find the following FAQ from XY-GLOBAL:

1. Who are your main customer?

Our major customers are ASUS, FLEXTRONICS CHINA, FLEXTRONICS ISRAEL, FLEXTRONICS PORTUGAL.

2. What is your main products?

XY-GLOBAL focus on the production of Die Casting Parts, CNC Machining Parts, CNC Lathe Machining and more. You can see the detailed from <http://www.diecastingpartsupplier.com>

3. How many people are there in your sales team? How many engineers?

Currently we have 10 sales and 5 professional engineers to support clients in product area.

4. What document should the customer send to us for cost caculation ?

In order to provide our most accurate price, customer need to provide the 2D drawings, 3D drawings, order quantity, surface treatment, delivery time, etc.

5 How to keep your products quality stable ?

We keep our products in IQC,IPQC,OQC different processing to control strictly. Meanwhile we have 8D report to analysis the problems.

6. How to protect our products, molds and information ?

We will sign the confidential contract with customers to protect all the information. Then in the production processing, the documents which customer sent to us will be under control, then engineer team will transfer customer drawing into our format, and send to production department or related for further action. And the molds are dedicated for each client.
