

Abstract/Summary	summary of the work, including a brief description of the research topic, objectives, methodology, results, and conclusions
Introduction	background information, research goals, and the significance of the study
Methodology	description of the research methods, data collection, and analysis techniques
Results	presentation of the findings, including statistical data and graphs
Discussion	interpretation of the results, comparison with previous studies, and implications for future research
Conclusion	summary of the main findings and the overall contribution of the study
References	list of sources cited in the research, including books, journals, and online resources
Appendix	additional information, such as raw data, supplementary figures, or detailed calculations
