

PROCESS	DESCRIPTION
1. Raw material preparation	Raw materials are prepared and weighed according to the recipe.
2. Mixing	The raw materials are mixed in a large mixer to form a homogeneous mixture.
3. Extrusion	The mixture is extruded through a die to form a continuous strand.
4. Drying	The extruded strand is dried in a drying oven to remove moisture.
5. Grinding	The dried strand is ground in a mill to form a fine powder.
6. Sieving	The ground powder is sieved to remove any lumps or impurities.
7. Packaging	The sieved powder is packaged in bags or containers for storage and distribution.
